

Proposed Revision of Administrative Rule R365-3. Computer Software Licensing, Copyright, and Control

January 18, 2001

The Information Technology Policy and Strategy Committee requested that Rule R365-3. Computer Software Licensing, Copyright and Control, be reviewed and that the request for approval to sell or transfer software be submitted to CIO for action.

Discussion of the Issues:

- Prior to the sale or transfer of state-developed software, the request for approval shall be submitted to the Chief Information Officer rather than the ITPSC. The CIO will provide the ITPSC a summary of the requests and actions taken.
- Wording has been added to this rule to clarify that state-developed software is generally owned by the state and shall be treated as a state-owned asset.
- Agency responsibility has been further defined to assure that its employees are informed of the conditions of this rule.

Recommended Actions:

Committee approval of the proposed rule changes.
